SUMMARY

Data Analyst with **nearly 1 year of professional experience** delivering business intelligence dashboards, KPI reporting, and data visualization. Hands-on with Power BI (DAX, Power Query), SQL, Python (Pandas, NumPy), and Excel, with a strong reporting-automation and stakeholder communication foundation; AI Engineering undergraduate (expected 2027).

WORK EXPERIENCE

Data Analyst

Sep 2025 - Apr 2026

Muhimma Digital Platform Co.

Remote

- Delivered **8 production Power BI dashboards** used daily by enterprise brand clients across **KSA and UAE**, owning the full lifecycle: data modeling, DAX measures, visual design, and performance optimization.
- Architected and shipped **2 production React dashboards** as product owner, directing AI-assisted implementation through to enterprise-quality release; defined requirements, structured data flow, designed UX, and acted as the quality gate.
- Independently designed **3+ dashboards from raw datasets** without prior specifications by defining the data model, KPIs, and user flow, reducing planning dependencies on the broader team.
- Partnered directly with **enterprise stakeholders** to translate ambiguous business questions into dashboard specs over **8 months**, iterating on data and UX issues to reduce client revision cycles.

Data Analyst Intern

Jul 2025 - Sep 2025

Sustainly.tech

Remote

- **Cleaned, integrated, and analyzed** data from **15+ sources** (financial disclosures, academic research) across **8 sectors** using **Python (Pandas, NumPy)**, identifying key trends and risk drivers across the dataset.
- Built scenario-based forecasting models in Python integrating **9 years** of historical financial and operational data.
- Simulated **9 forecast scenarios** under multiple policy assumptions and translated the results into a stakeholder-ready analysis with visualizations supporting corporate decision-making.

SKILLS

- **BI & Visualization:** Power BI (DAX, Power Query/M, data modeling), Tableau, Microsoft Excel (PivotTables, Power Query, Power Pivot), Data Visualization, Dashboard Development
- **Reporting & BI:** Business Intelligence (BI), Reporting Automation, Ad-hoc Analysis, KPI Reporting
- **Data & Analytics:** Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), SQL, ETL pipeline design, KPI development, Statistical analysis
- **Databases:** PostgreSQL, MySQL, SQLAlchemy
- **Tools:** Git, GitHub, Docker, Jupyter Notebook
- **Communication:** Stakeholder communication, Requirement gathering, Cross-functional collaboration

FEATURED PROJECT

Automated Reporting System

github.com/AED7M/Automated-E-commerce-Reporting-System

- Replaced a **roughly 4-hour** manual reporting workflow with a Python pipeline that ingests data from **5+ e-commerce sources**, calculates **10+ KPIs**, and produces a full HTML report in **under a minute**.
- Built an ETL pipeline that processes **90,000+ transactions** across **60+ product categories**, computing 10+ weekly KPIs (revenue, customer satisfaction) with consistent visualizations.
- Generated **15+ actionable insights per run** with natural-language summaries, replacing ad-hoc spreadsheet analysis with a reproducible, scheduled output.

EDUCATION

Bachelor of Artificial Intelligence Engineering, Mansoura university

Expected 2027

COURSES AND CERTIFICATIONS

Data Science Course, ALX and Explore AI

May 2025

DataCamp Certified Data Analyst , DataCamp

August 2024
